

Histogram of cycleLens

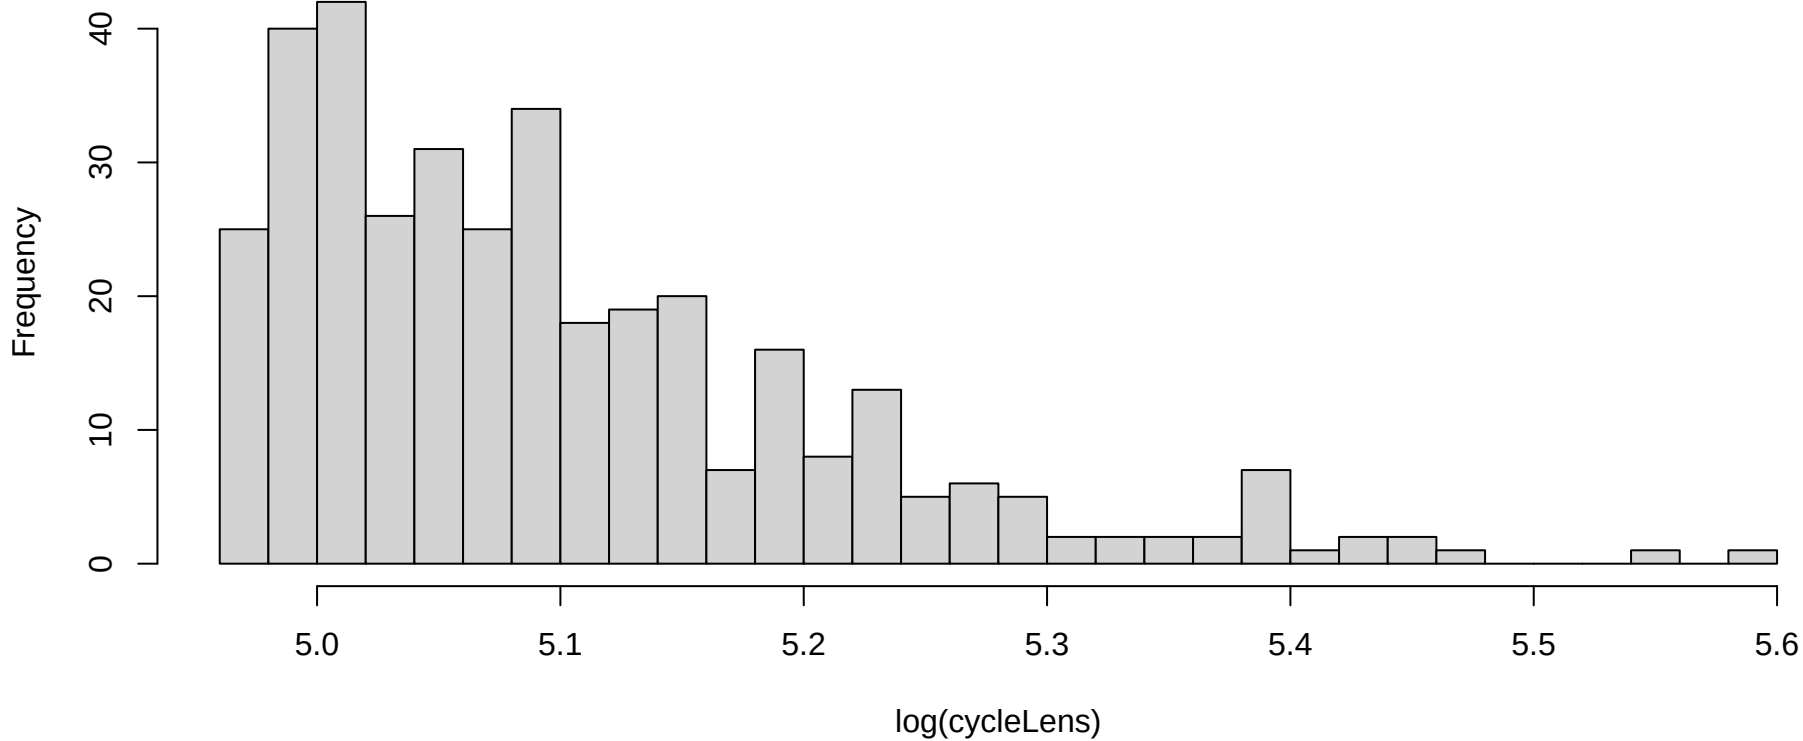

density(x = cycleLens)

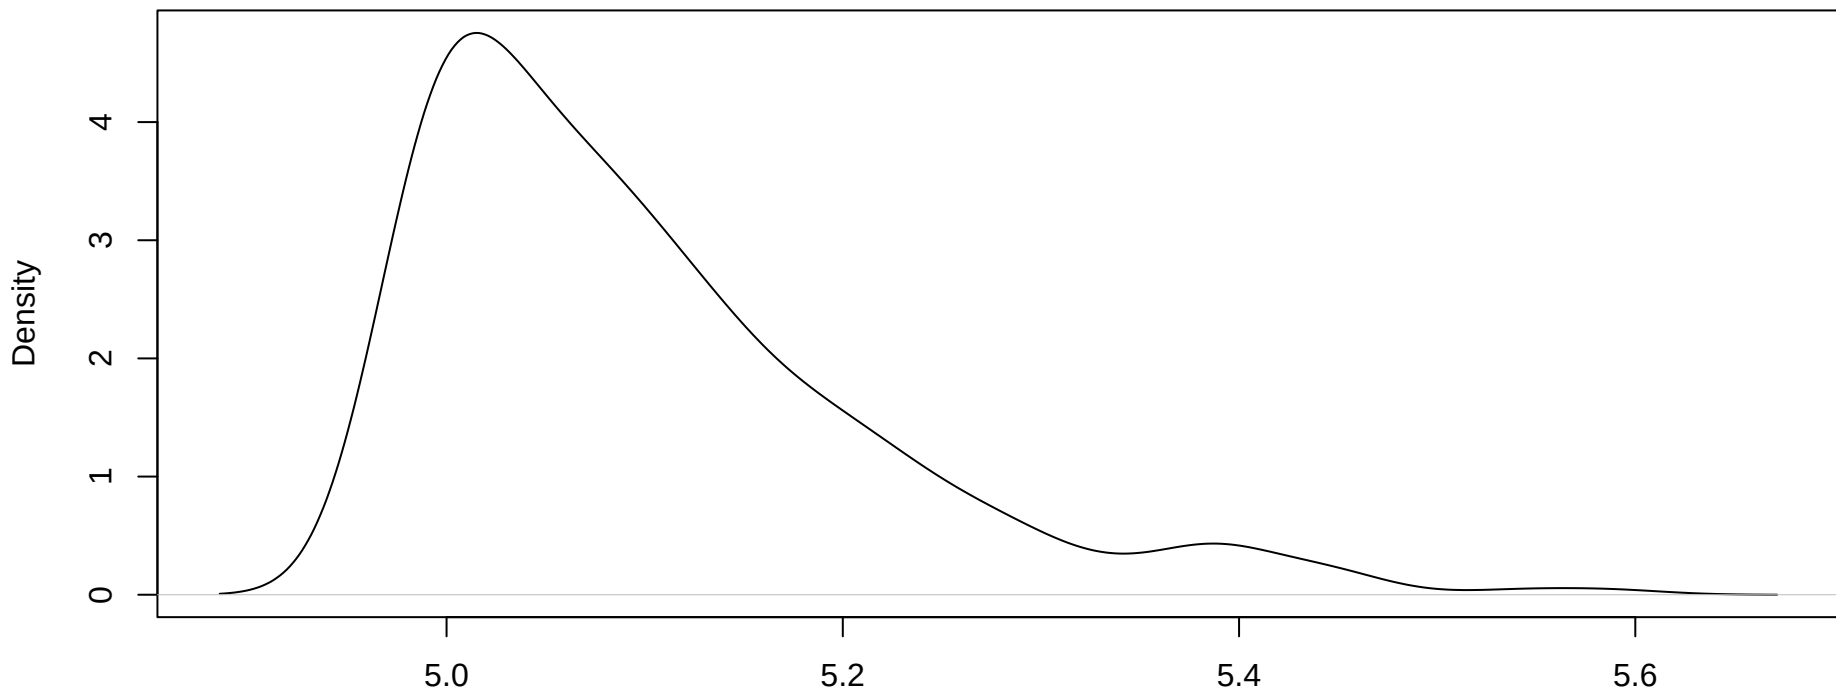

N = 363 Bandwidth = 4.545

Histogram of $\log(\text{cycleLens})$

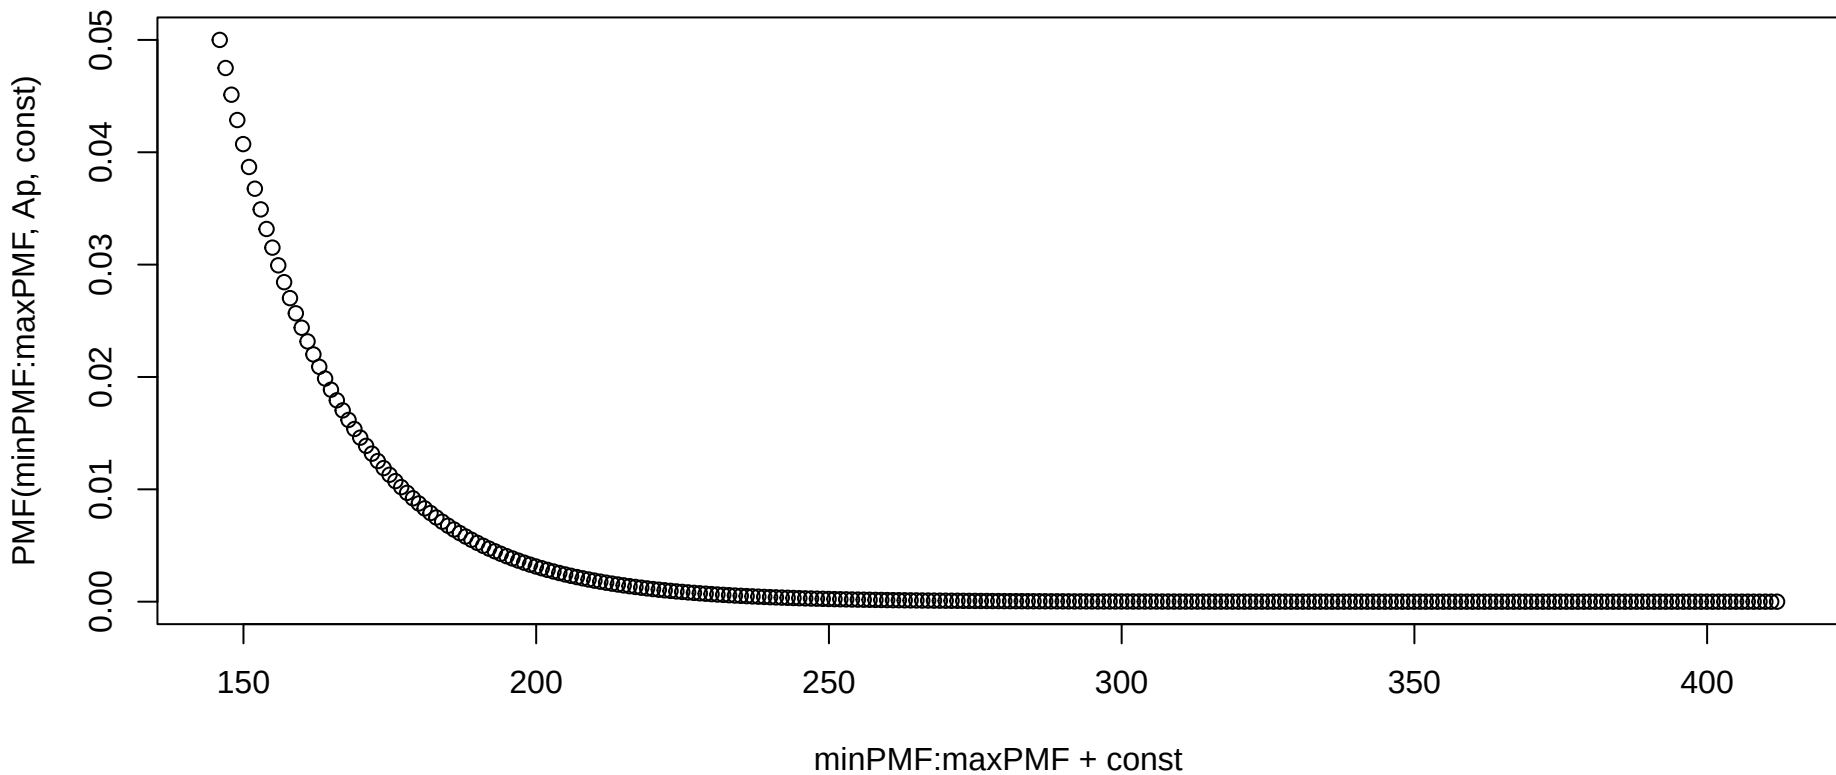

density(x = log(cycleLens))

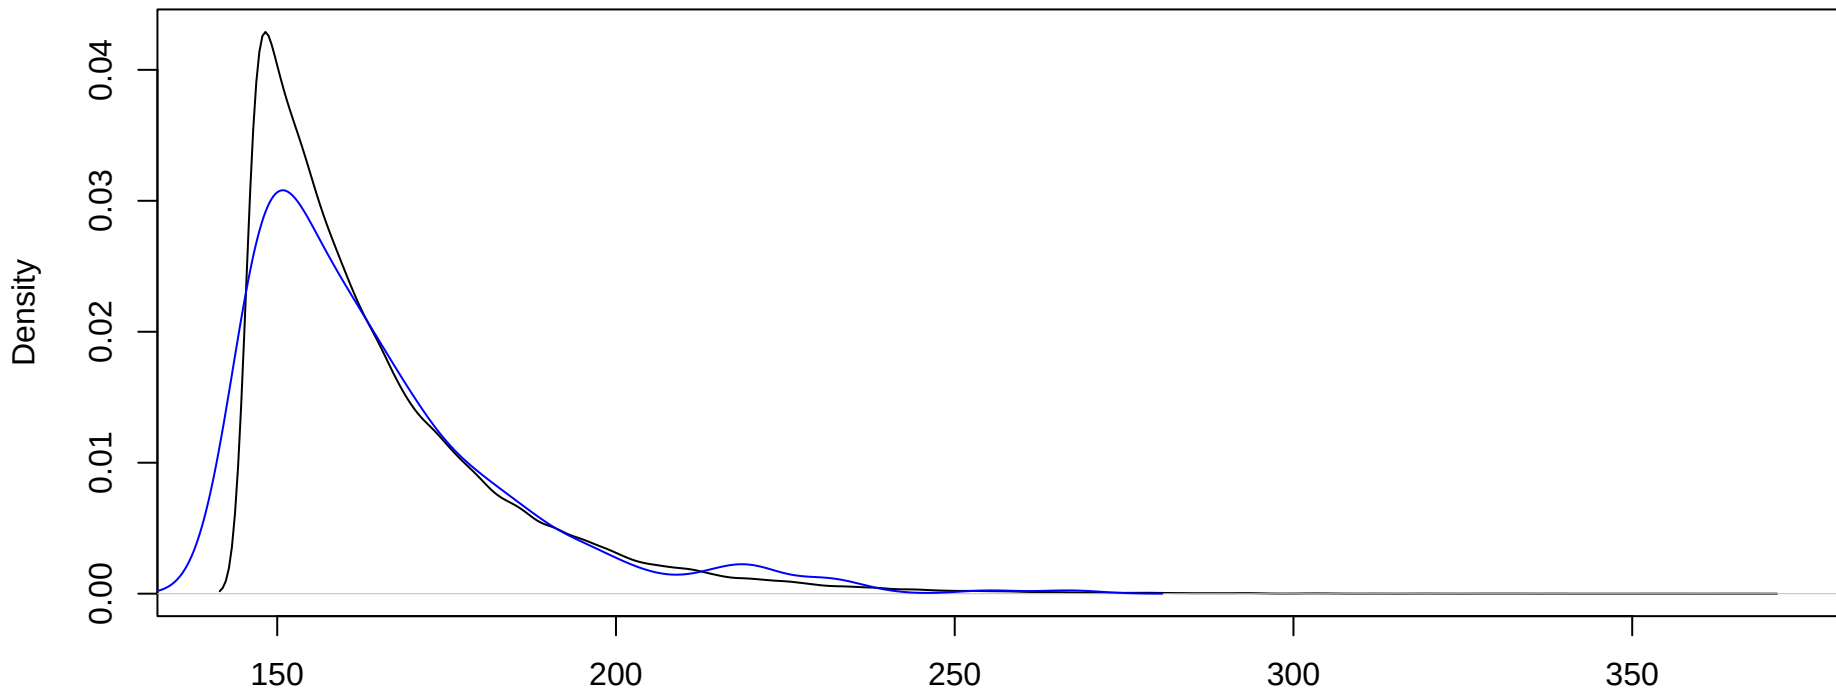

N = 363 Bandwidth = 0.0281

PMF of cycles for model

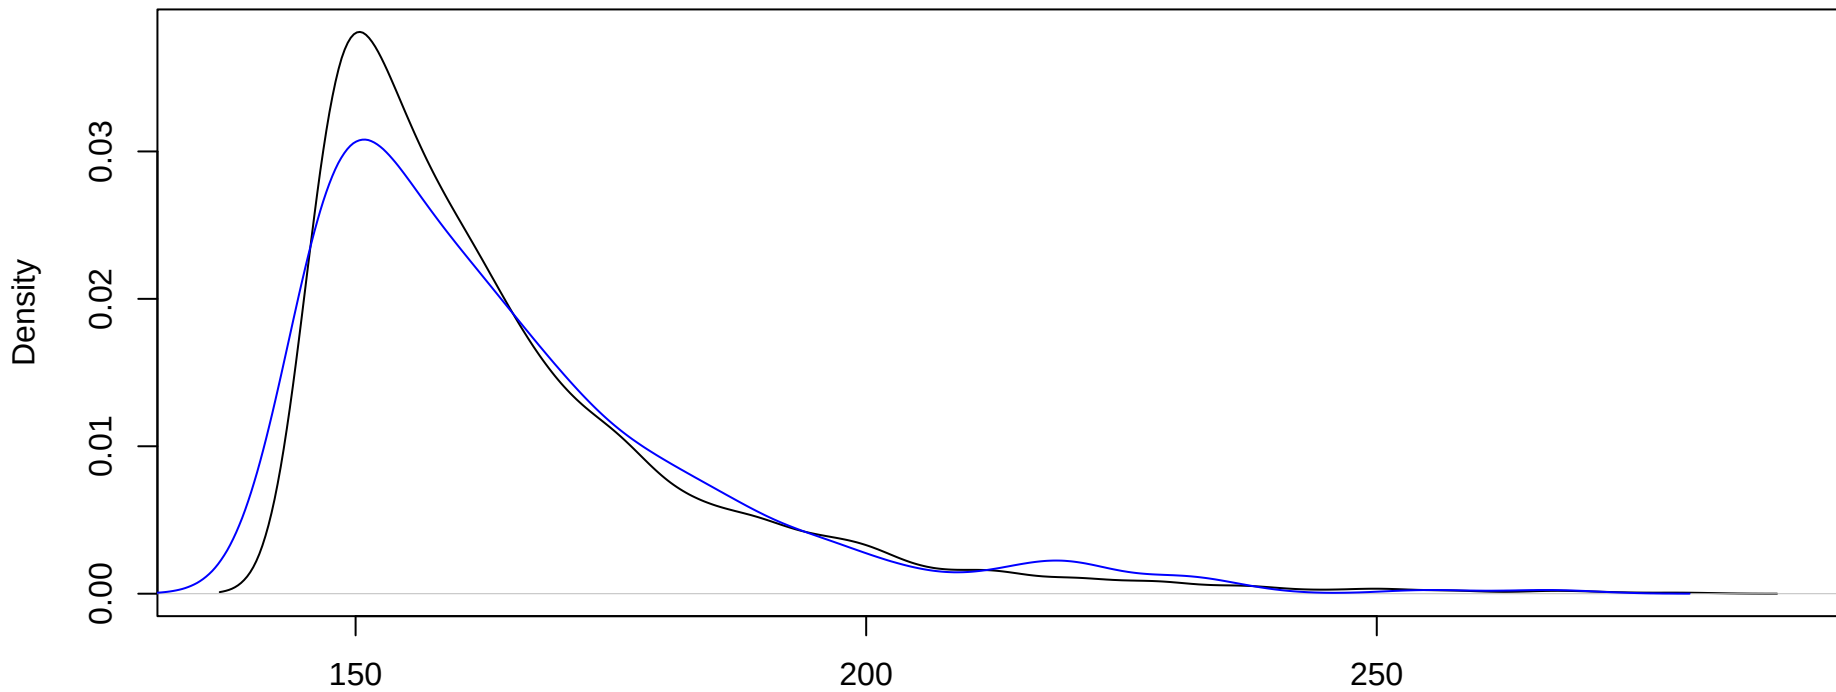

real data in blue, math prediction in black (100000 cycles)

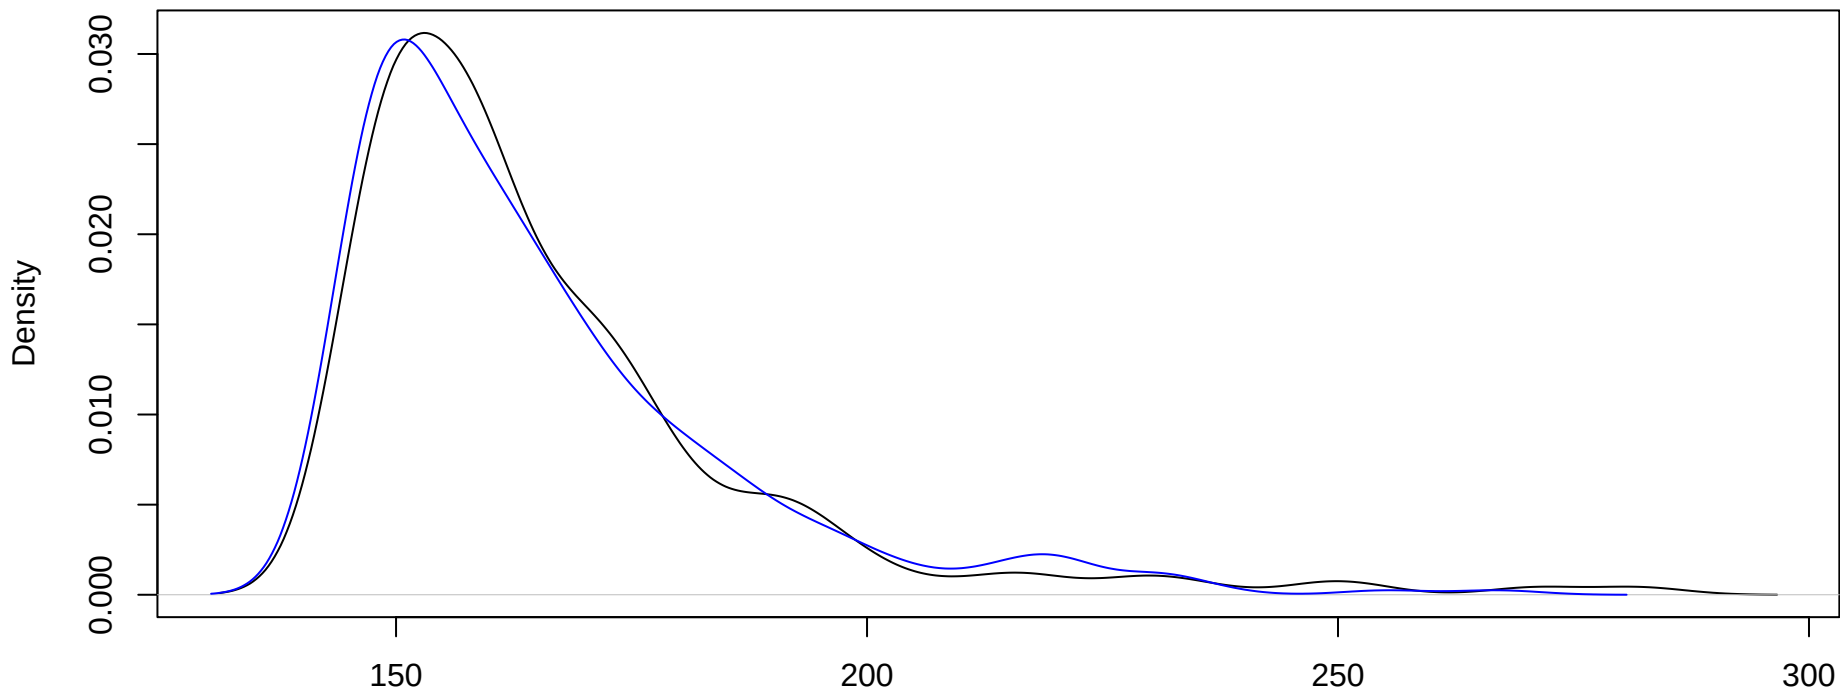

N = 100000 Bandwidth = 1.478

real data in blue, math prediction in black (2000 cycles)

N = 2000 Bandwidth = 3.084

real data in blue, math prediction in black (200 cycles)

N = 200 Bandwidth = 4.888
