

Histogram of cycleLens

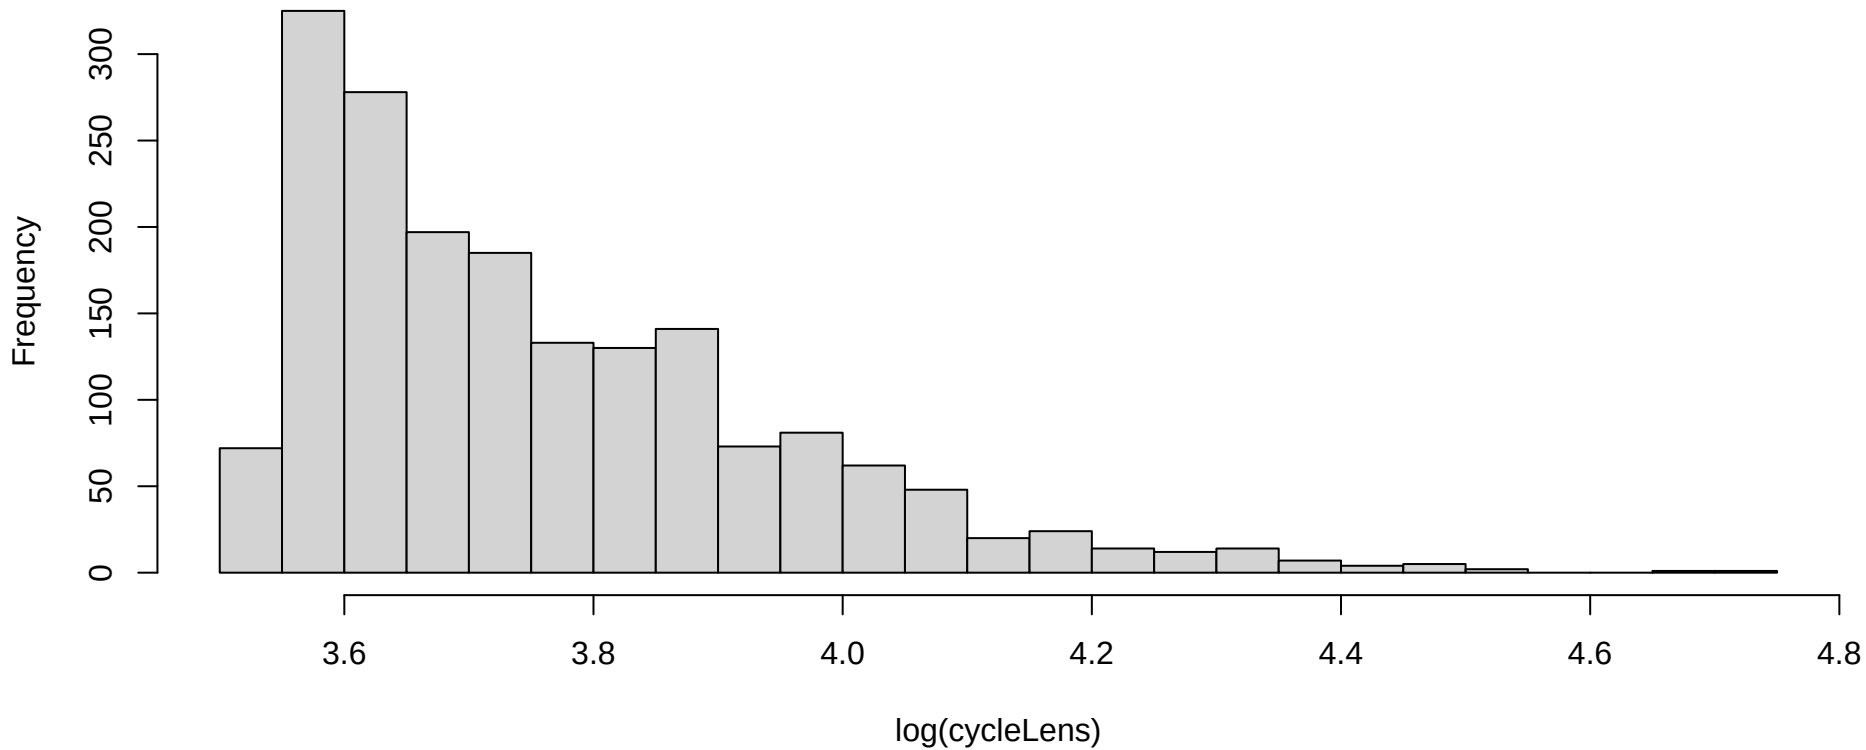

density(x = cycleLens)

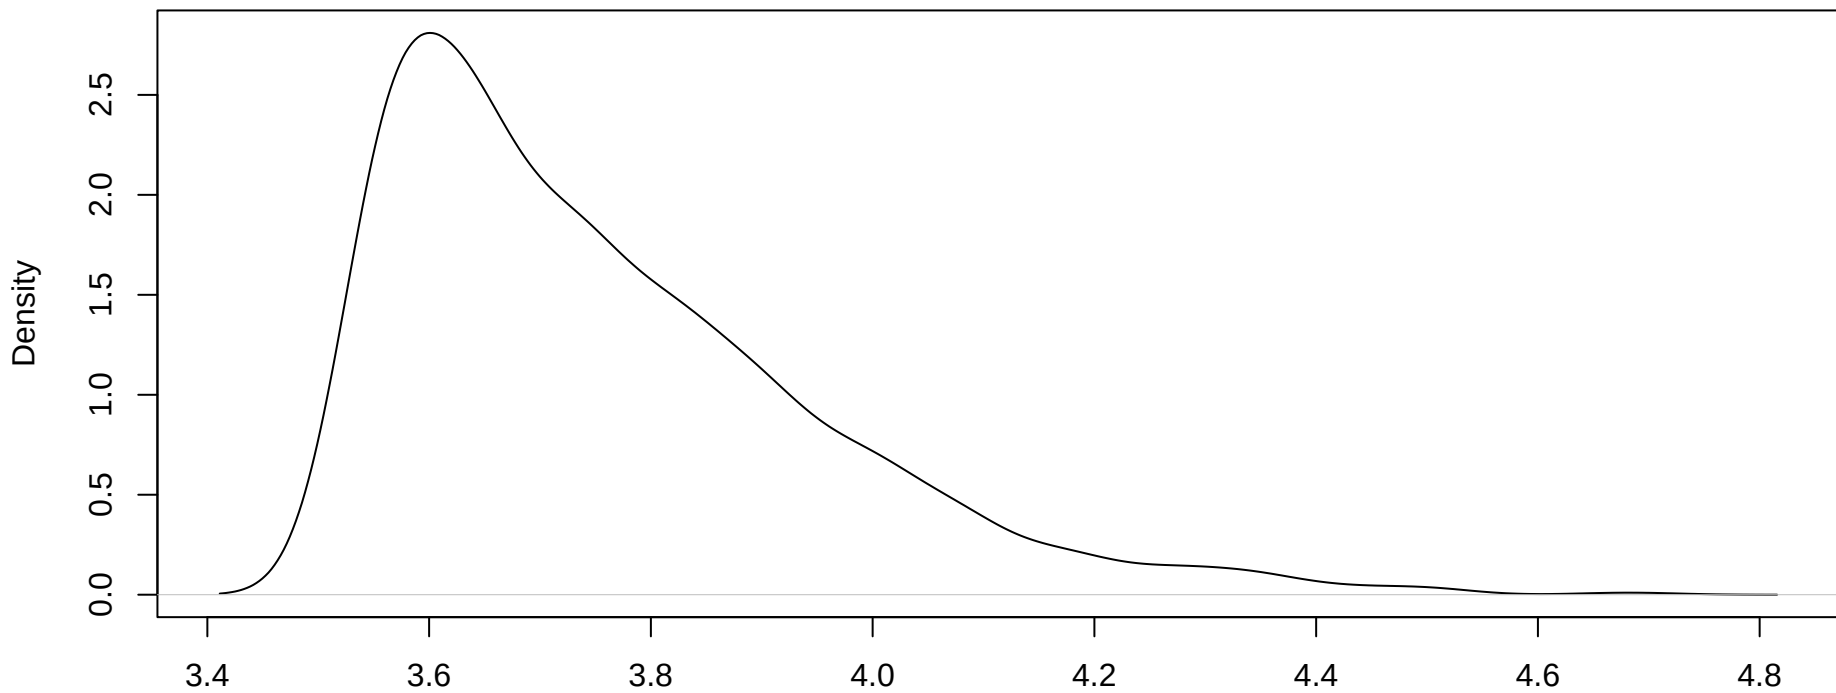

N = 1829 Bandwidth = 1.645

Histogram of $\log(\text{cycleLens})$

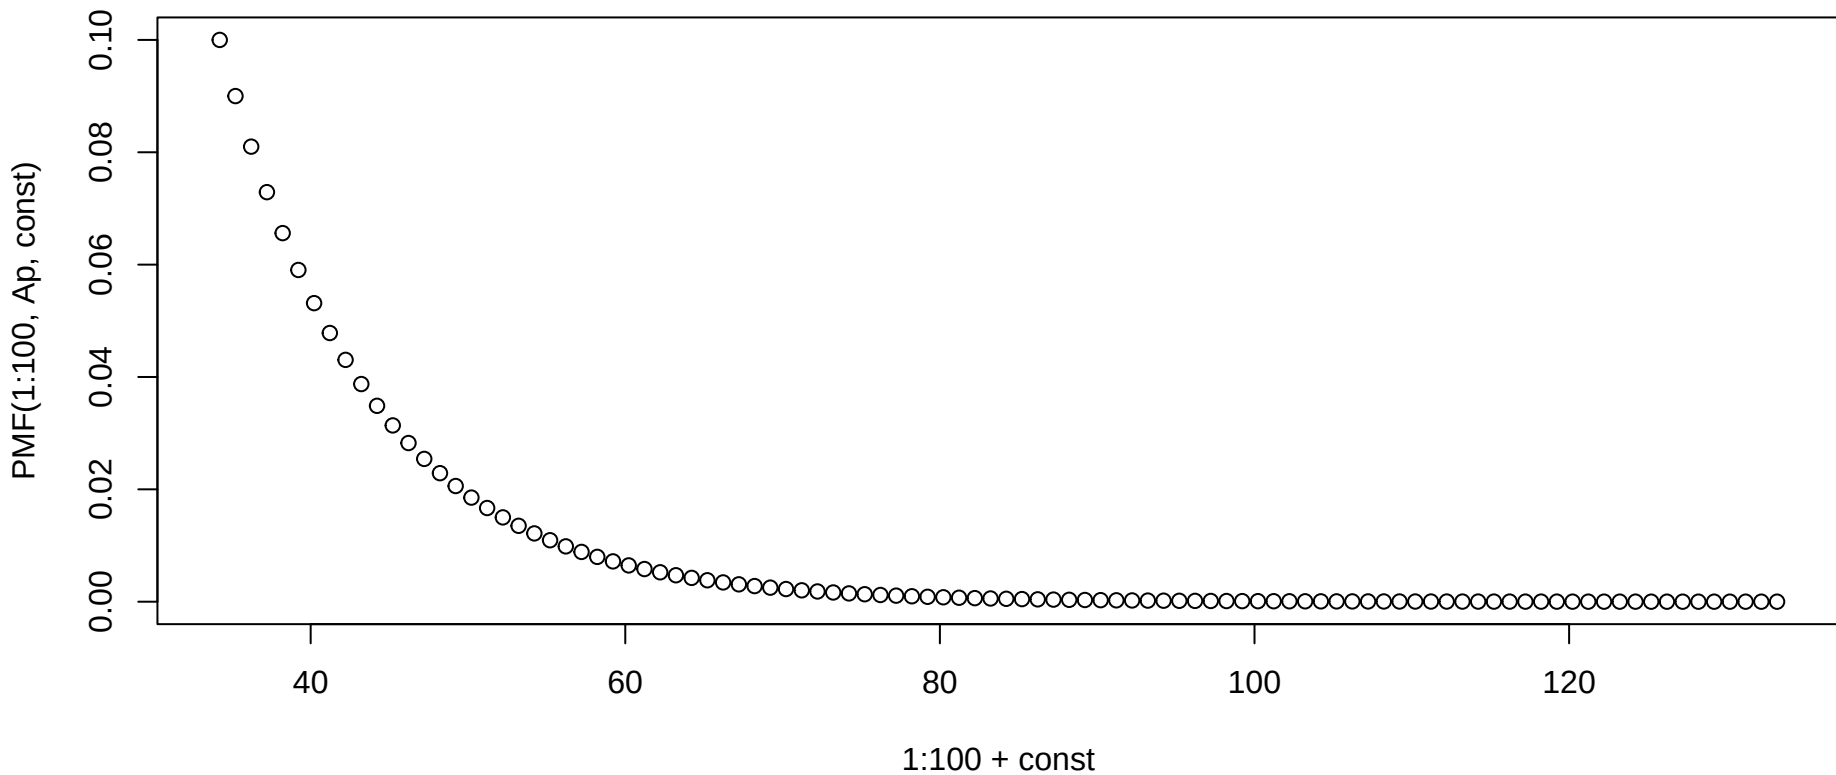

density(x = log(cycleLens))

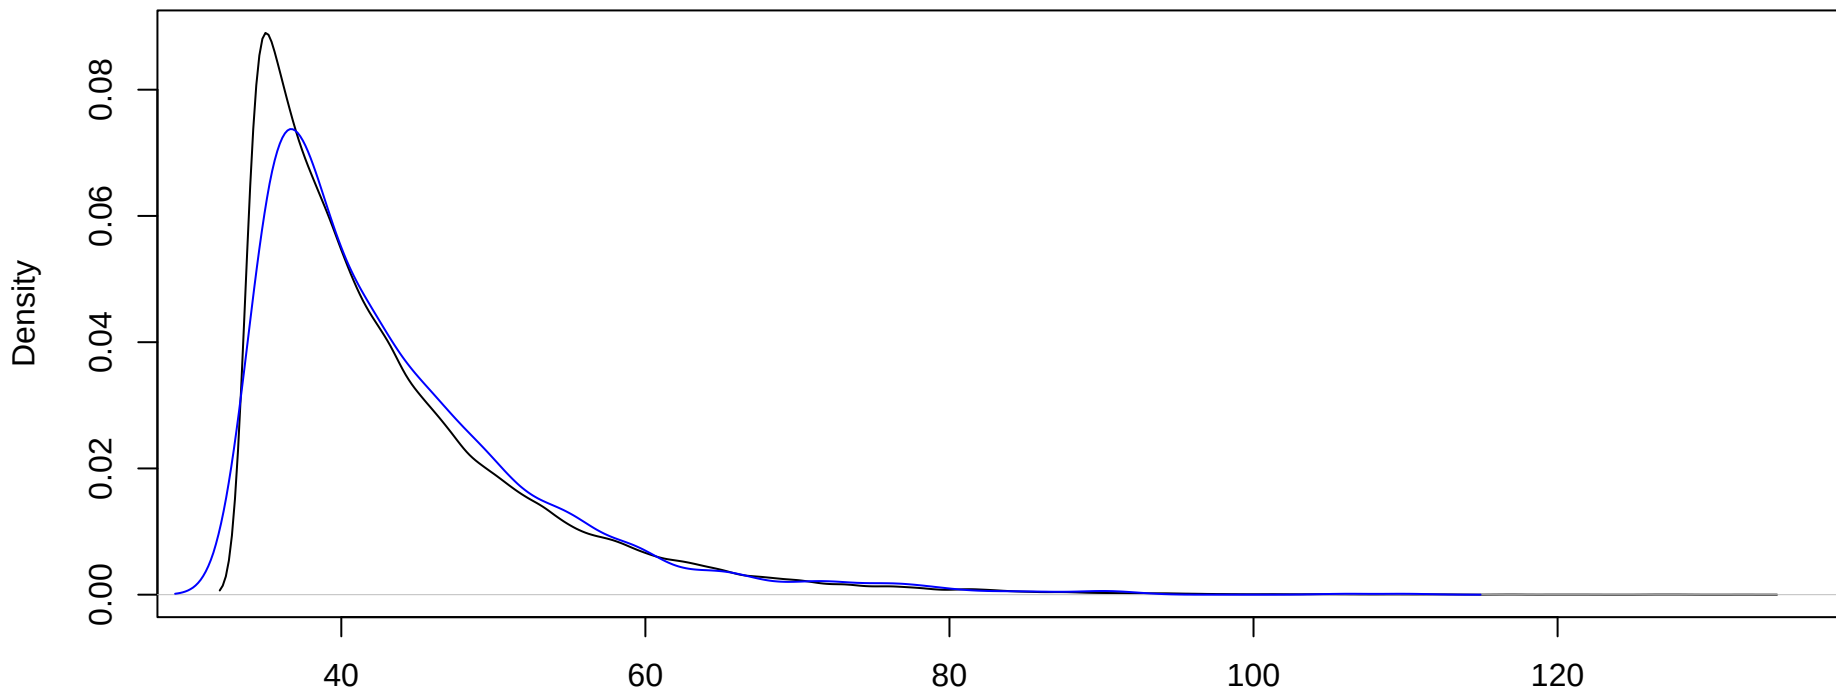

N = 1829 Bandwidth = 0.0384

PMF of cycles for model

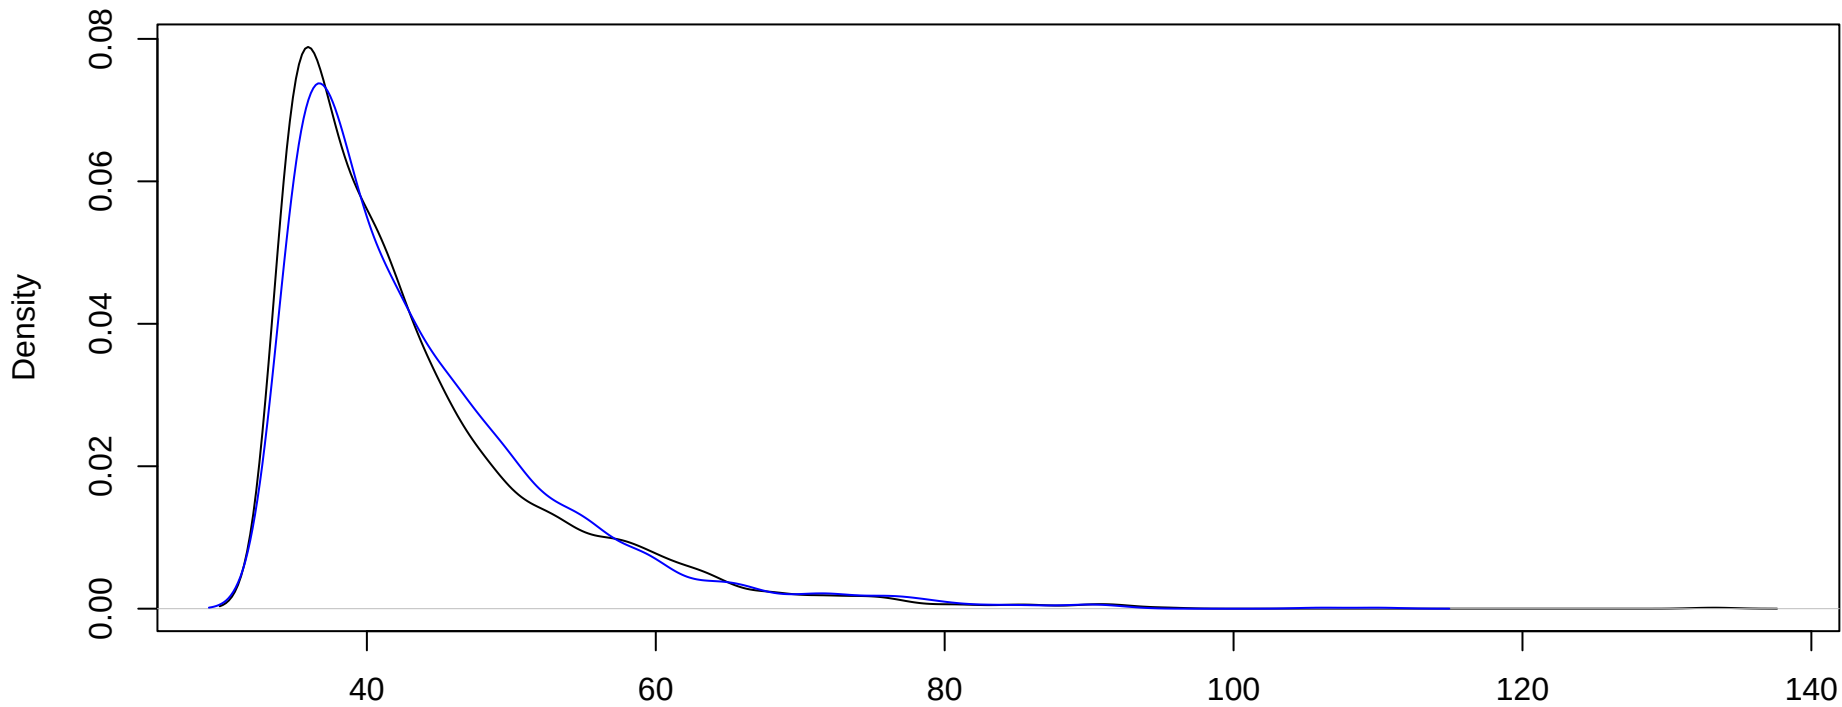

real data in blue, math prediction in black (100000 cycles)

$N = 100000$ Bandwidth = 0.7388

real data in blue (~2000 cycles), math prediction in black (2000 cycles)

$N = 2000$ Bandwidth = 1.469
